To whom it may concern,

Re: Airmyn Foreshore Stabilisation Project

I write to inform you of environmental surveys which are due to take place on the river bank in Airmyn. These surveys are due to take place on the 3rd August 2021 and are focused on assessing habitats and the physical conditions of the River Aire.

These surveys will be carried out by Arup on behalf of the Environment Agency and will take one day to complete.

These surveys are part of a project looking at stabilising the foreshore berm in front of the Airmyn flood defence wall and will increase our understanding of environmental constraints in the area. We will provide further communications about this project at a later date.

Should you have any queries regarding this work, please contact me at the below email address.

Yours faithfully,

C. Mills
